Q 1 Why do you think farmers cannot entirely depend on monsoon for irrigation ?

Ans 1. Monsoons are not certain in nature, so farming cannot entirely depend upon rains. The constant availability of water for irrigation provides a sense of stability to the farmer and also encourages him to practice newer farming methods and patterns to maximise the productivity.

Q 2. What is rain water harvesting ? How can it be the best way to handle water crises in India ?

Ans 2. Rain water harvesting is a technique of collection and storage of rain water which used to run off from the roof tops, parks ,roads , and tanks .Rain water harvesting is a viable solution to help meet this demand and help solve our water crisis and Strom water runoff problems .

On new page write summary
