Ch\_\_9

Q 4.- Explain in brief the three stages of a river.

Ans.- A river passes through three stages:

1. Upper Course - The formation of a river valley begins with the carving out of a channel. The flow of the river is very swift, and it cuts a deep valley.
2. Middle Course - The river leaves the mountain and enters the plain. It becomes deeper and wider and flows gently. Due to erosion and deposition action of a river at its banks, a winding curve is formed which is called meander.
3. Lower Course - At this stage, the river flows very slowly and joins a bigger water body such as lake or sea, forming a delta.

Activity

This year we all have celebrated 74th Independence day. It means India has achieved 73 years of freedom. Clement Richard Attlee was the prime minister of Britain at the time of Independence. Lord Mount Batten became the first Governor General of new Dominions of India ( collect some informations about our national flag and where it's hoisted. )

Write an essay on the celebration of Independence day 2020 while we were staying at home. Prepare your project work in a file and send in the group.
