

H. W

CLASS 7 date (05/05/20)

Maths

1. Simplify the expression and find the value if $x=2$ $3(x+2)+5x-7$
2. If $a=0, b=-2$ find $2a+5b$
3. Simplify the expression and find their value if $x=3, a=-1, b=-2$, $3x-5-x+9$
4. If $a=2$, $b=-2$ find the value of $2a+4b-2c$

Science

1. Explain why ice melts in your palm.
2. What is the measure of heat.?
3. Define temperature with the help of an example.

Social Studies

Chapter :- Our Environment

Read the following topic and Frame five questions

Topic

The Atmosphere
