S.S.T.

Ans- 3 - The part of the earth which lies to the north of the equator is called the northern hemisphere. The part which lies towards the south of the equator is called the southern hemisphere. The east of the prime meridian is known as the Eastern hemisphere and the west of the prime meridian is known as the Western hemisphere.

Ans-1-longitudes are vertical lines joining the north pole and the South pole and latitudes are horizontal lines running parallel to the equator.

2- longitudes are of equal length but the length of the latitudes keeps on decreasing as we move away from the equator.

3-longitudes are 360 in total and latitudes are 180 in total.

4-longitudes are numbered starting with the prime meridian marked as 0° longitude and the latitudes are numbered starting with the equator mark as 0° latitude.

5-the distance between the longitudes keeps on decreasing as we move towards the poles and the distance between the latitudes remain the same.
