## S.S.T.

Ans5- Deserts are formed because they fall under the dry winds belts when dry wind blows from inland, instead of rain bearing winds from the sea. They are also formed due to deforestation. There are three types of desert-

1-hot desert- these deserts are found between 15 ° to 30°latitude on both sides of the equator. They receive very less or no rainfall.

2-temperate desert-these deserts are found between latitude of tropical and polar regionhair temperature is bit low then hot desert.

3- Cold desert-these deserts are found near the poles or the Arctic and Antarctic circles.
