Homework for Class VI

Sub - Mathematics

Topic Name - Roman Numerals

Roman Numerals are a system of numerical notations used by Romans.

I	V	X	L	C	D	M
1	5	10	50	100	500	1000

Rules to form Roman Numerals.

Rule-1 When a symbol appears after a larger (or equal) symbol it is added.

$$VII = 5 + 2 = 7$$

$$XIII = 10 + 3 = 13.$$

Rule 2 If a symbol appears before a larger symbol it is subtracted.

$$IV = 5 - 1 = 4$$

$$IX = 10 - 1 = 9$$

Rule 3 If a symbol is written between two symbols of greater value, its value is subtracted from the symbol on its right.

$$LIX = 50 + (10 - 1) = 59$$

$$DXC = 500 + (100 - 10) = 590.$$
